    e. **Physical address:** Room 21, 9th floor, Arfa Software Technology Park

2. Introduction

Cyphlon is a Cyber Security startup, one of it's kind from Pakistan aiming to provide adequate cyber security services to online businesses, we strive to provide services that are cost affective, resource reductive, time reductive and of quality. We do so by means of asset evaluation on case by case basis, and do so by means of our online collaboration platform CyphlonX

Why CyphlonX

1. Time reduction

By establishing an effective collaboration between pentesters and clients, we ensure that you are able to attain quick results. With us on board, you will find that the total time that the test tends to take would decrease drastically, thereby providing you with quick results.

2. Cost reduction

We endeavor to ensure that pentests do not become a burden to you from a financial point of view. To make this certain, we strive to provide you with cost-effective pentests. This ensures that the financial input required is kept in check, which is beneficial for your company and business.

3. Resource reduction

Normally, when the reports of the pentest come in, a team of many people is required to assess it and perform the patchwork of the vulnerabilities that were detected. With our services, you would get the reporting in real time, which implies that it is just one personnel of the company who would have to be assigned to the task.

4. Quality of service

We strive to ensure that you get the best quality of service possible. We have put together a team of skilled researchers who are experienced and competent. Our team is recognized by renowned organizations all around the world.

3. Business concept

A real-time penetration testing collaboration framework CyphlonX

Cyphlon's penetration testing collaboration framework called CyphlonX provide real-time communication between your team and our world class penetration testers

A one stop security solution

We provide penetration tests by means of cutting edge technologies to secure your network, Web applications and Mobile apps
